### Section 3. Composition / Information on Ingredients

Components:	CAS #	Percent
Parachlorobenzotrifluoride	98-56-6	50-75
HDI homopolymer	28182-81-2	25-50

### Section 4. First aid measures

<b>Eye Contact:</b>	Immediately flush eyes with water. Flush eyes with water for a minimum of 15 minutes, occasionally lifting and lowering upper lids. Get medical attention promptly.
<b>Skin Contact:</b>	Immediately flush skin with plenty of water. Remove clothing. Get medical attention immediately. Wash clothing separately and clean shoes before reuse.
<b>Inhalation:</b>	Rescuers should put on appropriate protective gear. Remove from area of exposure. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Keep victim warm. Get immediate medical attention. To prevent aspiration, keep head below knees.
<b>Ingestion:</b>	Small amounts which accidentally enter mouth should be rinsed out until taste of it is gone. Do not induce vomiting. Do not give liquids. Obtain emergency medical attention.

### Section 5. Fire-fighting measures

**Extinguishing media:** Carbon Dioxide, Dry Chemical, Foam, Water Fog

**Unusual Fire and Explosion Hazards:**

Flammable liquid and vapor. Vapors can travel to a source of ignition and flash back. Empty containers retain product residue (liquid and/or vapor) and can be dangerous. DO NOT pressurize, cut, weld, braze, solder, drill, grind, or expose

## SAFETY DATA SHEET

such containers to heat, flame, sparks, static electricity, or other sources of ignition. Also, do not reuse container without commercial cleaning or reconditioning. Closed container may explode under extreme heat.

### Special Firefighting Procedures:

As in any fire, wear self-contained breathing apparatus pressure-demand (MSHA/NIOSH approved or equivalent) and full protective gear. Evacuate all unnecessary personnel. Shut down motors, pumps, electrical service and eliminates all sources of ignition. Do not use water. Water spray to cool containers or protect personnel. Use with caution.

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

#### Steps to be Taken in Case Material is Release or Spilled:

Wear appropriate personal protective equipment (See Exposure Controls / Personal Protection Section). Eliminate all ignition sources. Evacuate unnecessary personnel. Prevent additional discharge of material if able to do so safely. Do not touch or walk through spilled material. Avoid runoff into storm sewers and ditches which lead to waterways. Ventilate spill area. Stay upwind of spill. Do not apply water to the leak. Water fog may be used to suppress vapors. Collect spilled materials for disposal. Use only non-combustible material for clean-up. Use clean, not-sparking tools to collect absorbed materials. Absorb spill with inert material (e.g. dry sand or earth), then place in a chemical waste container. Recover by pumping (use an explosion proof or hand pump). Pump and free liquid into a closed but not sealed container to allow for the escape of any CO<sub>2</sub> that forms. Sealing the container may lead to rupture as any contaminated isocyanate reacts. Wash contaminated area with large amounts of water.

## Section 7. Handling and storage

**Precautions for safe handling:** Use only in a well ventilated area. Avoid breathing vapors, fumes or mist. Avoid contact with eyes, skin and clothing. Material accumulates static charge (ignition source). Ground and bond containers with transferring material. Use spark-proof tools and explosion proof equipment. Always open container slowly to allow excess pressure to vent. After opening, purge container with nitrogen before reclosing. Follow all MSDS/label precautions even after containers are emptied because they may retain product residues.

#### Conditions for safe storage, including any incompatibilities:

Keep away from heat, spark and flame. Store containers in a cool, well ventilated place. Keep container closed when not in use. Storage under nitrogen atmosphere is recommended. Material reacts with water. Dike storage containers to contain 110% of tank volume. Vent indoor tanks to an outside location so escaping vapors will not contaminate any work area.

## Section 8. Exposure controls / personal protection

#### Control parameters Occupational Exposure Limits:

Parachlorobenzotrifluoride	N.D.	N.D.	N.D.	N.D.
HDI homopolymer	N.D.	N.D.	N.D.	N.D.

## Personal Protection:

<b>Respiratory Protection:</b>	NIOSH/MSHA approved respirators may be necessary if airborne concentrations are expected to exceed exposure limits.
<b>Skin Protection:</b>	Wear impervious gloves to prevent contact with skin. Wear long sleeves when contact is likely to occur. Wear protective gear as needed – apron, suit, boots.
<b>Eye/face Protection:</b>	Use chemical splash goggles and face shield (ANSI Z87.1 or approved equivalent).
<b>Other Protective Equipment:</b>	Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower.
<b>Hygienic Practices:</b>	Do not eat, drink, or smoke in areas where this material is used. Avoid breathing vapors. Remove contaminated clothing and wash before reuse. Wash thoroughly after handling. Wash hands before eating.
